

trangia®

Trangia

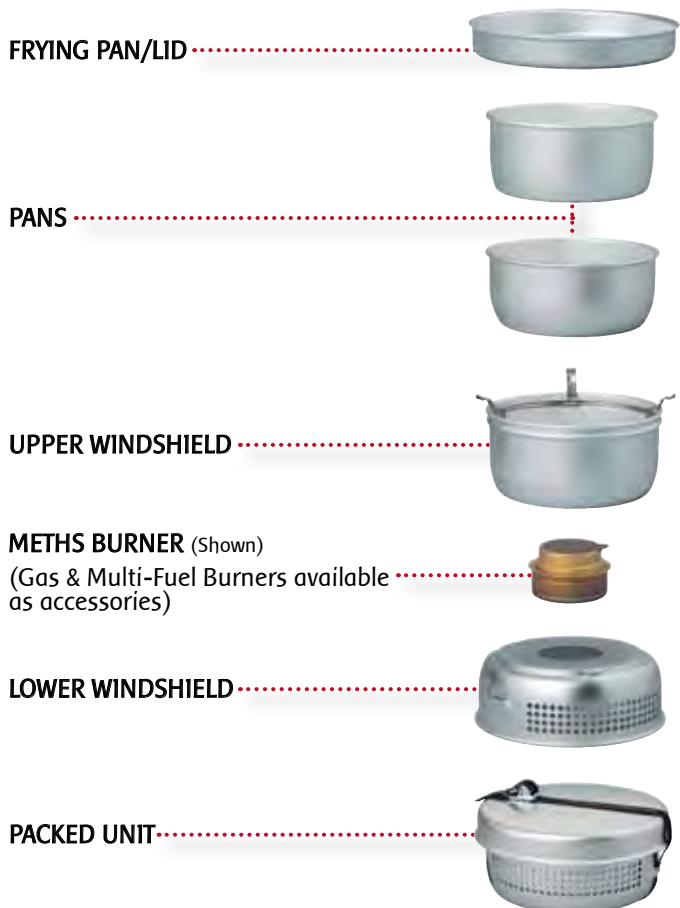

The Trangia stove is today used by outdoor people all over the world. For half a century, the Trangia stove has been the natural choice for storm-proof stoves. Our approach to quality has put its stamp on manufacturing throughout the process, from the choice of materials to function. We have the accumulated skills and experience over 75 years and our proximity to the mountain environment and practical testing, combined with modern technology, design and constant development, means we can offer a complete, reliable, quality stove. The Trangia Original is and remains the original: a light, fast and, above all, reliable stove for the outdoors. In all weathers.

TRANGIA – The Complete Cooking System

The Trangia principle is simple but incredibly effective. The pan is held at the optimum distance over the spirit burner inside a windshield. The windshield protects the burner from the wind but ensures it is well ventilated. All of the heat is directed upwards to the pan so little energy is wasted.

WHATS IN A TRANGIA STOVE?

The Trangia Cooker became popular because of its principal advantages over the alternatives :

1. Works at any temperature and in any weather. In fact, unlike the alternatives, it works well in windy conditions. You can turn the windshield into the wind to increase heat output of the burner.
2. Compact. All of the Storm Cooker Systems and their pans pack neatly into a compact unit.
3. You don't have to be an expert mechanic to maintain it. There are no moving parts to break, no jets to clean and you don't need to pump it up to pressurise it.
4. Safe. The stove is less prone to flares than pressure stoves, also the lower windshield makes a very Stable base.
5. Clean. Fuel vaporises quickly without leaving a dirty residue. Methylated spirit is a cleaning fluid whereas paraffin is a dirty fuel.
6. Quick and easy to set up. In a typical backpacking situation, one person can put up the tent while another puts the kettle on. This means that you get a hot drink sooner than with a conventional stove which has to be shielded from the weather.
7. Low running cost. When compared with pressure stoves as spares are easily and fully available and there are no jets to clean.

These advantages still stand today despite advances in gas stoves and multi-fuel pressure stoves. Now that gas stoves are popular a seventh ecological advantage is the lack of waste. There are no canisters to dispose of and no oily slime to clean away.

BOILING TIMES

The common way to compare stoves is the boiling point for half a litre or a litre of water. Unfortunately many magazines compares stoves in nil wind conditions. In these conditions the most powerful flame will always win – even if it is inefficiently shielded from the weather.

If you do the comparison in typical windy conditions, then the Trangia spirit burner is actually one of the fastest stoves on the market. A Trangia spirit burner burns for about 25 minutes on one fill. 50ml, of meths (fill well to 2/3 full). This will boil 1 litre of water in about 10 minutes in all weathers.

When incorporated inside the Trangia windshield all the gas burners are much faster than the equivalent burners on a simple tripod stand. From the result of field tests, the fastest system in practical conditions is the Primus Gas Burner installed inside the Trangia Windshield. This takes about 6 or 7 minutes for a litre of water in outdoor conditions. If you use the frying pan as a lid then more heat is retained in the pan.

SERIES 25

Series 25 includes somewhat larger stoves suitable for groups of about 3-4 people. They are excellent family stoves with large pans, a wider frypan and a bigger kettle. With the supports in the raised position, the stove can be used with large billies from the rest of the Trangia range.

All the stove systems in the 25 series have two saucepans (1.75 and 1.5 litres), a 22 cm frying pan, windshields (upper and lower), a burner, a pan grip and a strap. Dimensions 22 x 10.5cm.

SERIES 27

Series 27 offers good stoves for the lone walker or two people. The pans are smaller and the kettle is sized accordingly. A small, compact stove that takes up minimal room in the rucksack. Here too, large billies can be placed on the raised supports in the upper windshield. All the stove systems in the 27 series have two 1-litre saucepans (1 graduated, 1 ungraduated), an 18 cm frying pan, windshields (upper and lower), a burner, a pan grip and a strap. Dimensions 18.5 x 10cm.

MINI-TRANGIA 28

The Mini-Trangia was developed specifically for the lightweight camper or mountain marathon competitor and is a stripped down system for use when weight is critical.

MATERIALS

ULTRALIGHT ALUMINIUM

Aluminium is a lightweight material that conducts heat well. Our aluminium stove systems spread heat quickly and evenly. This means that food does not, for example, burn and stick to the centre of the frying pan. In addition, the hard surface means that the systems are very resistant to scratching and wear. Ultralight aluminium is 50% stronger than ordinary aluminium. Consequently, less material is required to manufacture the stove systems. As a result, they are lighter.

ULTRALIGHT HARDANODIZED ALUMINIUM

Besides making our windproof stove systems even more resistant to scratching and wear, hardanodizing is a surface treatment that also improves corrosion resistance. Furthermore, the treatment makes the stove systems easier to clean than untreated stove systems. These excellent properties have led to hardanodized cookware replacing our Titanium and Duossal ranges.

NON-STICK

The non-stick coating gives the ideal surface for frying, and requires little or no cooking fat or oil. It also makes washing up easier, because nothing sticks. Non-stick is slightly more susceptible to scratches and abrasion, so use only wooden or plastic utensils. For those who want light packs, fuss-free eating and easy washing up.

Series 25 Cookers – 3/4 Person

TRANGLIA
Series 25

25-1UL – 25 Cooker

Stove with 2 pans (1.75L & 1.5L) & 1 frying pan (22cm)
Weight: 865g
Min order qty multiple: 1

25-8UL/HA – 25 Cooker Hardanodized with Kettle

Stove with 2 hardanodized pans (1.75L & 1.5L),
1 hardanodized frying pan (22cm) & kettle
Weight: 1055g
Min order qty multiple: 1

25-2UL – 25 Cooker with Kettle

Stove with 2 pans (1.75L & 1.5L), 1 frying pan (22cm) & kettle
Weight: 1055g
Min order qty multiple: 1

25-1GB/UL – 25 Cooker with Gas Burner

Stove with 2 pans (1.75L & 1.5L) & 1 frying pan (22cm)
Weight: 865g
Min order qty multiple: 1

25-5UL – 25 Cooker Non-Stick

Stove with 2 non-stick pans (1.75L & 1.5L)
& 1 non-stick frying pan (22cm)
Weight: 980g
Min order qty multiple: 1

25-2GB/UL – 25 Cooker with Gas Burner & Kettle

Stove with 2 pans (1.75L & 1.5L), 1 frying pan (22cm) & kettle
Weight: 1055g
Min order qty multiple: 1

25-6UL – 25 Cooker Non-Stick with Kettle

Stove with 2 non-stick pans (1.75L & 1.5L),
1 non-stick frying pan (22cm) & kettle
Weight: 1170g
Min order qty multiple: 1

25-5GB/UL – 25 Cooker Non-Stick with Gas Burner

Stove with 2 non-stick pans (1.75L & 1.5L)
& 1 non-stick frying pan (22cm)
Weight: 980g
Min order qty multiple: 1

25-7UL/HA – 25 Cooker Hardanodized

Stove with 2 hardanodized pans (1.75L & 1.5L)
& 1 hardanodized frying pan 22cm
Weight: 865g
Min order qty multiple: 1

27-1UL – 27 Cooker

Stove with 2 pans (1L) & 1 frying pan (18cm)

Weight: 720g

Min order qty multiple: 1

27-8UL/HA – 27 Cooker Hardanodized with Kettle

Stove with 2 hardanodized pans (1L), 1 frying pan (18cm) & kettle

Weight: 860g

Min order qty multiple: 1

27-2UL – 27 Cooker with Kettle

Stove with 2 pans (1L), 1 frying pan (18cm) & kettle

Weight: 860g

Min order qty multiple: 1

27-1GB/UL – 27 Cooker with Gas Burner

Stove with 2 pans (1L) & 1 frying pan (18cm)

Weight: 720g

Min order qty multiple: 1

27-5UL – 27 Cooker Non-Stick

Stove with 2 non-stick pans (1L) & 1 frying pan (18cm)

Weight: 798g

Min order qty multiple: 1

27-5GB/UL – 27 Cooker Non-Stick with Gas Burner

Stove with 2 non-stick pans (1L) & 1 frying pan (18cm)

Weight: 798g

Min order qty multiple: 1

27-6UL – 27 Cooker Non-Stick with Kettle

Stove with 2 non-stick pans (1L), 1 frying pan (18cm) & kettle

Weight: 938g

Min order qty multiple: 1

Mini Trangia

Aluminium pan (0.8L), non-stick lid/frying pan (15cm), spirit burner, windshield and handle

Weight: 330g

Min order qty multiple: 1

27-7UL/HA – 27 Cooker Hardanodized

Stove with 2 hardanodized pans (1L) & 1 frying pan (18cm)

Weight: 720g

Min order qty multiple: 1

Spirit Burner

Min order qty multiple: 1

Gas Burner

Fits in lower windshield as alternative to the spirit burner. High efficiency. Easy control.
Min order qty multiple: 1

Multi-Fuel Burner

Fits in lower windshield. Burns on petrol, paraffin or diesel. Includes self-cleaning shaker jet & fuel bottle
Min order qty multiple: 1

Safety Valve

Min order qty multiple: 1

Fuel Bottle

0.5L with Safety Valve
Weight: 115g

1L with Safety Valve
Weight 160g

Min order qty multiple: 1

Multidisc

Available for 25 & 27
Multiple functions, strainer, cutting board, base for use on snow, etc.
Min order qty multiple: 1

Windshield Lower

Available for 25 & 27
Min order qty multiple: 1

Windshield Upper

Available for 25 & 27
Min order qty multiple: 1

Kettles

Available for 25 & 27
Min order qty multiple: 1

Saucepans

Available for 25 & 27
In Aluminium, Non-stick or Hardanodized
Min order qty multiple: 1

Frypans

Available for 25 & 27
In Aluminium, Non-stick or Hardanodized
Min order qty multiple: 1

Pan Handle

Min order qty multiple: 1

Bag

Available for 25 & 27
Min order qty multiple: 1

Strap

Min order qty multiple: 1

Tundra 1 Cook Kit

2 non-stick pans (1.75L & 1.5L), 1 non-stick frypan (20cm), handle & bag
Weight: 540g
Min order qty multiple: 1

Tundra 2 Cook Kit

2 non-stick pans (1.75L & 1.5L), lid that fits both, handle & bag
Weight: 440g
Min order qty multiple: 1

Tundra 3 Cook Kit

2 non-stick pans (1.75L & 1.5L), 1 non-stick frypan (20cm), lid that fits both, handle & bag
Weight: 620g
Min order qty multiple: 1

2.5L Billy Can with Lid

Fits the Series 27 stoves
Weight: 395g
Min order qty multiple: 1

4.5L Billy Can with Lid

Fits the Series 25 stoves
Weight: 530g
Min order qty multiple: 1

Aluminum Kettle 1.4L

Weight: 225g
Min order qty multiple: 1

Non-Stick Frying Pan 22cm

with folding handle
Weight: 270g
Min order qty multiple: 1

Mess Tin

with handle.
16.5 x 9 x 6.5cm / Weight: 270g
Min order qty multiple: 1
